## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosenberg (U. S. Patent 5,691,898, cited art by the applicant).

Rosenberg discloses all the claimed invention of a force sense imparting type input apparatus, including an operation portion 22, a position sensor 28, an actuator 30, a temperature sensor 58 and a controller 26. It is to be noted that Rosenberg meets all the structural limitations and thus has inherent functional properties as claimed by the applicant.

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Muramatsu, Hegg, Rosenberg and O'Brien et al. disclose related art.
